

Traditional Sauna Kits

2025-2026 SAUNA KIT DETAILS

about blackstone

Blackstone Saunas was established by the Black family in 2004 with health first and foremost in our minds. We established our business after much thought and consideration for what would be most helpful to our clientele and future customers. We studied a variety of products and found saunas the most effective tool for detoxifying the body from environmental pollutants and medicinal toxins, their effectiveness in relieving stress, and their unparalleled ability to help the body heal from illness and injury.

With a passion for wellness and relaxation, we specialize in custom-building saunas for new homes, commercial establishments, and luxurious spas. Our team of expert craftsmen combines traditional sauna design with cutting-edge infrared technology, creating a haven of rejuvenation and tranquility in every space. Whether you seek a traditional sauna experience or the innovative benefits of infrared heat, we are committed to elevating your well-being through our meticulously crafted saunas.

what's included...

- Homecraft Heater + digital controls and sauna rocks.
- Western Red Cedar (A+Better, clear, kiln-dried, t&g) to line walls and ceiling.
